## Toyota Vehicle Recall

As has been widely reported in the global media, Toyota Motor Corporation in the U.S. and Europe has recalled a large number of vehicles to address a problem with accelerator pedals.

As the distributor for Toyota vehicles in Fiji, Asco Motors have been receiving many queries from customers and authorities regarding the impact of this recall on vehicle sold in Fiji.

Asco Motors has just received official notification from Toyota Motor Corporation confirming that no vehicles sold by Asco Motors in the Fiji market are affected by this issue.

Customers therefore have no reason for concern.
